- No electrician required to assemble

The perfect marriage of a traditional Nordic design with superior carbon far-infrared heating panels, provide a highly beneficial and enjoyable home sauna experience. Thick panels of solid Canadian hemlock spruce, toughened glass and heavy-duty hinges, with no toxic glues or materials, ensures the Zen Far-Infrared Sauna is both durable and sustainable.

Simple to assemble in a compact minimalist footprint to suit the style of any home, the newer far-infrared process of warming your body with dry heat, means you can enjoy longer, deeper, more comfortable sauna sessions with more intense benefits.
